JULY 1999**PROJECT DESCRIPTION**

The Pharma Plus Drug Mart shown in the photo above utilized a combination of aluminum wall panels and natural concrete block to provide the exterior look the building owners desired for a series of new stores. Kanalco solid 3 mm (1/8") thickness aluminum panels represent a flagship building finish for Pharma Plus Drug Mart outlets. The Kanalco panels with a white Duranar finish met the requirements for cost, bright clean-looking appearance, practical installation, and easy maintenance. Approximately 2200 square feet (204 m²) of pan-formed panels were employed. Panel shape was 22 mm (7/8") deep, excluding sub girts, and 813 mm x 1830 mm (2'-8" x 6'-0") in size.

THE CONSTRUCTION TEAM

Owner's Representative: Charles Dyer, Director of Construction and Design, Pharma Plus Drug Marts. Mississauga, Ontario.

General Contractor: A-Door Construction Inc., Ingersoll, Ontario.

Metal Fabrication: Kanalco Ltd., Architectural Metal Products, Pickering, Ontario. Kanalco, in addition to producing the aluminum wall panels for Pharma Plus also manufacture a whole host of metal panel products including REYNOBOND® Aluminum Composite Building Panels, Stainless Steel Wall Panels, Metal Column Covers, Rainscreen Cladding, and Pre-Formed Metal Profiles. Literature available upon request.
