Composite Metal Building Panels
KANALCO LTD.**PROJECT DESCRIPTION**

The Pride Signs Headquarters shown in the photo above utilized aluminum wall panels exclusively for the exterior building finish. It is interesting to note that a company committed to enhancing other owners' buildings chose Kanalco Aluminum Wall Panels to show off its own building. The Kanalco panels, with a green Duranar finish (two shades) and red accents for panel joints and window frames, blends beautifully with the Pride image. Also the curved panels at the corners "soften" building angularity nicely. Approximately 3000 square feet (279 m²) of pan-formed panels were employed. Panel shape was 32 mm (1-1/4") deep, excluding sub girts, and 813 mm x 2440 mm (2'-8" x 8'-0") in size.

THE DESIGN AND CONSTRUCTION TEAM

Building Owner: Brad Hillis, President, Pride Signs Ltd.

General Contractor: D.K. Construction Limited, Kitchener, Ontario.

Metal Fabrication: Kanalco Ltd., Architectural Metal Products, Pickering, Ontario. Kanalco, in addition to producing the aluminum wall panels for Pride Signs also manufacture a whole host of metal panel products including REYNOBOND[®] Aluminum Composite Building Panels, Stainless Steel Wall Panels, Metal Column Covers, Rainscreen Cladding, and Pre-Formed Metal Profiles. Literature available upon request.
